

PROJECT SPOTLIGHT

CHARLOTTE DOUGLAS INTERNATIONAL AIRPORT

Over the past three years, the Leeper Construction team has collaborated with Holder Construction and Edison Foard to construct and expand an updated Charlotte Airport - a project that has been both thrilling and challenging. The scope of the project involves a new terminal lobby expansion canopy, ticket lobby expansion, central energy plant, and baggage claim upgrades, with completion slated for 2025.

Throughout the project, we've employed over one hundred individuals in various roles through our Workforce Development initiative, which we hope to continue as we move forward with phases five and six this fall.

Thank you to our trade partners at Holder Construction and Edison Foard!

FOURTH CONSTRUCTION CAREERS CONNECTION HIRING EVENT

Bonitz, Inc.

Cook & Boardman

Wayne Brothers Companies

D.H. Griffin Companies

On August 30th, 2023, the Workforce Development team successfully hosted the fourth Construction Careers Connection Hiring Event. Our community partner, Urban League, co-hosted the event at their downtown Charlotte facility. The event aimed to provide an opportunity for both experienced and entry-level construction professionals to engage with our hiring trade partners. Notably, the event witnessed a significant turnout from our trade partners, including Adams Electric, American Electric, Bonitz, Carpet Queen, Cook & Boardman Group, D.H Griffin, Precision Plumbing, and Wayne Brothers. Job seekers were thrilled to learn about the various positions available to them. We are actively planning the next Construction Careers Connection event for this upcoming fall!
